## AGAINST NEW BRITISH ORDER

Dutch Envoy Has Conference With Secretary Lansing, but State Department Has No Definite Plan to Meet Trade Ban.

Washington. Sept. 16.—Secretary
Lansing and the Dutch Minister, Mr.
Van Rappard, had a conference at the
State Department to-day regarding the
latest British order restraining commerce
to Holland as well as to Norway, Sweden
and Denmark. The Dutch Minister, who
for months past has been urging the
United States to adopt methods which
would bring practical results toward
helping commerce between the two countries, inquired particularly whether Secretary Lansing had any definite plan of
procedure to meet the present crisis. He

procedure to meet the present crisis. He was informed that the United States was watching matters very closely and endeavoring to keep itself informed on the various phases of the situation.

There is doubt at the State Department as to whether the new order affects American goods already covered by let-

ters of assurance through the operation of the Netherlands Overseas Trust.

At the British Embassy it was stated positively that such goods are not affected. There is no change in the British policy, it was added, and the plan is to allow only another income into rest. FOR FRESH ASSAULT

Consul-General Skinner, at London, in a cable message dated September 11 points out that the order says "it is presumed that American goods already covered by letters of assurance will not be stopped."
Commit-deneral Skinner's cable was as

ront and repulsing German counter further export licenses or other facilities stacks, the British pushed forward will be given until October 1, or until further notice by the British Government, for the shipment of the following goods to the countries named :

"Denmark—Animal oils and fats, apri-cot kernels, borate of lime, borax and boron compounds, bristles, egg yolk and ront, made progress north of Bouch-evenes and are still attacking there. Starches, sulphur, powdered tale, tapicca, the French also best of German oll seeds (excluding soya seeds).
"Norway—Beef casings, borax and borax compounds, cocoa, coffee, nickel.

sheepskins, powdered talc, tar

to communicate with the War Trade Department. The foregoing restrictions have been agreed to by the Allies and applied to shipments from the United States. The articles mentioned are those which have been supplied to the countries concerned in quantities alleged to exceed the normal requirements of such countries. As stocks decline articles will be removed from the list of prohibition.

"The Netherlands Overseus Trust has been advised to issue no further permits

"The Netherlands Overseas Trust has been advised to issue no further permits for goods covered by this notice. It is presumed that American goods already covered by letters of assurance will not be stopped." Consul-General Skinner cabled to-da that the "blacklist" order had been mod-ified to permit British marine insurance companies to underwrite insurance on

property of "blacklisted" United States firms. It does not apply to Philippine or Porto Rican firms on the "blacklist." Officials consider the modification of benefit principally to British insurance companies, but it will also aid "black-listed" American firms in moving their merchandise by allowing them to obtain British underwritings. Officials here be-lieve the real motive is to enable British marine underwriters to hold American insurance business and not lose it through the operation of the "blacklist."

NAVY MAIL CENSORED.

Official Letters of U. S. Intercepted by British Officials.

Washington, Sept. 16. — it was learned to-day that official mail of the United States Navy Department has for months past been intercepted on its way from Hongkong and China and opened and examined by the British censors at Vancouver. Naval officers said no se-cret is made of the fact and that the confidential communications are plainly marked "opened by the censor." Fruit-less appeals have been made by these officers to have action taken by this Government which would put a stop to

"Sweden—Antimony, apricot kernels, binder twine, bristles, carrauba wax, casein, casing, cocon, corkwood, coffea, dried fruit, gums (except shellac), hair, honey, leather, margarine (raw materials used in manufacture of), meat, peach kernels, plum kernels, rice, rosin, spices starches, siail, steel (high speed), tea, turpentine and turpentine oil.

"Netherlands—Biscuits, bristles, eggs."

Glovernment which would put a stop to the practice way. Inquiry shows that the Navy Department has in each instance referred the matter to the State Department, but it is not known whether the matter ever went any further. The practice, however, continues and mail reaching here from the Aslatic squadron in Chinese waters is frequently opened.
